

Quality Repair Parts & Undercarriage

G.E.T Parts Solutions from ITR

Many Teeth and Adapter styles and profiles are available from ITR to match machine requirements and different material working conditions.

- ... Extensive coverage for use on a wide range of equipment manufacturers and machine models.
- ... Broad range of teeth and adapters styles compatible with common GET manufacturers.
- ... Produced from premium quality alloy steels, and heat treated to obtain the right blend of strength, maximum wear life and superior resistance to breakage.
- ... ITR's GET products are custom engineered to provide the best overall results with different machine applications and in severe operating conditions.
- ... High resistance to Abrasion and Impact damage in tough working conditions.
- ... Manufactured to precision tolerances to insure proper fit and retention.
- ... Engineered to provide maximum penetration while protecting blades, buckets, and moldboards.

Warranty:
Protected by one of the strongest warranties,
all Router bits, Cutting Edges, Teeth and
Adapters are guaranteed against breakage
in normal operation.
